- ❖ Documented the technical & functional specifications.
- ❖ Researching and recommending software and systems choices to meet an organization's business requirement.

PROJECTS DONE:

Project Name: Punching Machine

Front End: Dot Net

Back End: My Sql

Content: To know the vacant space for parking the vehicle by punching. By punching we can know the vacant spaces for the parking of two wheelers and four wheelers by using this method we can avoid rush and can parked the vehicles easily. We can save the time by searching the vacant space for parking.

Project Name: BUG TRACKING SYSTEM

Content: Triage, the process of reviewing incoming bug tickets, gathering more information about the situation, and verifying whether the report is valid, is a critical part of the day-to-day operation of all of our projects. Some new tickets are valuable reports of broken behaviour, others are suggestions for enhancements both large and small, and some are, in fact, not bugs at all. Identifying which issues are which and facilitating timely communication between the reporter and the contributors whose input is necessary to resolve the problem are all parts of the triage process.

Project Name: AVOIDING DUPLICATION IN DATABASE

Content: The aim of this application is to place our products in a load balancing cloud server. The user before add their products check the capacity of their private database. If it is full and then he can choose any of the public cloud servers. Before adding data check for the duplicate entries. If one cloud is find data is automatically moved to other.

DECLARATION :

I consider myself familiar with Software Engineering aspects. I am also confident of my ability to work in a team.

I hereby declare that the information provided is true to the best of my knowledge.

Yours sincerely,

Alfina S S
